TABLE OF CONTENTS

Volume 178

ARTICLES

ABD-ALLA, A. M. / Generation of Waves in an Infinite Micropolar Elastic Solid Body under Initial Stress 175

BAHGAT EL-SHAARAWY, M. / Contribution to the Higher Levels of Neutral Helium Atoms Deviating from Boltzmann Distribution 45

BEZCHASTNOV, V. G. and G. G. PAVLOV / Quantum Relativistic Theory of the Cyclotron Radiation in Strongly-Magnetized Plasmas: Fine Structure of the Spectra and Maser Effect 1

BALACHANDRA SWAMY, A. C. / Effects of Solar XUV Variations on the Thermosphere and the Variability of the Photoionization Efficiency Parameter during the Solar Cycle 21 71

BARRETO, W. and L. A. NÚÑEZ / Radiating Spheres in General Relativity with a Mixed Transport Energy Flow 261

DEB, T. K., G. BISWAS and S. KARANJAI / Solution of the Equation of Transfer for Interlocked Multiplets by the Method of Discrete Ordinates with the Planck Function as a Nonlinear Function of Optical Depth 107

DWIVEDI, B. N. and A. L. MACKINNON / Heating of Astrophysical Plasma by Mildly-Relativistic Non-Thermal Protons 287

ELDABE, N. T., M. A. MAHMOUD and G. M. A. EL RAHMAN / Unsteady Magnetic Boundary-Layer Flow of Power-Law Non-Newtonian Conducting Fluid through a Porous Medium past an Infinite Porous Flat Plate 197

GLEISER, R. J., A. D. DAGOTTO and C. O. NICASIO / Gravitational Radiation from Cosmic String Splitting on a Friedmann-Robertson-Walker Background 303

ISHIDA, T. and M. TAKEUTI / Modal Selection in Oscillator Model Equations with Two-Mode Nonresonant Coupling 311

IVANOV, G. R. / The Stellar Content of Associations and Star Complexes in M33 227

KARANJAI, S. and T. K. DEB / Solution of the Equation of Transfer for Coherent Scattering in an Exponential Atmosphere by Eddington's Method 299

LU, KAU-UN / A Mathematical Criterion describing the Fast Rise of a Class of Solar Flares 205

MOHAN, C., R. M. SAXENA, and S. R. AGARWAL / Eigenfrequencies of Small Adiabatic Barotropic Modes of Oscillations of Rotationally and Tidally-Distorted Stars 89

SAHA, D. and G. CHATTOPADHYAY / Periodicities of the Neutrino Burst from Supernova 1987A 209

SHAH, G. A. / Asymmetry Parameter and Efficiency for Radiation Pressure and Scattering of Electromagnetic Radiation by a very Large Dielectric Sphere 250

SHARMA, K. C. and URVASHI GUPTA / Finite Larmor Radius and Hall Effects on Thermosolutal Instability of a Rotating Plasma 147
SINGH, T., R. S. SRIVASTAVA and A. M. HELMI / Cylindrically-Symmetric Matter Distribution with a Magnetic Field in Einstein-Cartan Theory 277
TIWARI, R. N., J. R. RAO, and SAIBAL RAY / Gravitational Sources of Purely Electromagnetic Origin 119
TROFIMENKO, A. P. and V. S. GURIN / White and Grey Holes as Possible Sources of Gravitational- and Gamma-Ray Bursts from SN 1987A 217
URCH, I. H. / The Fokker-Planck Equation for Charged Particles moving in Random Electromagnetic Fields 185
VALLÉE, J. P. / Upper Limits to the Magnetism of the Shell Around the Bootes Void 41
VIIK, TÖNU / The X- Y-, and H-Matrices for Molecular Scattering 133

LETTERS TO THE EDITOR

BARMAN, S. K. / The Influence of the Total Optical Depth on the Distortions of the Outer Layers of a Star 325
CHAUVET, P., H. N. NÚÑEZ-YÉPEZ, and A. L. SALAS-BRITO / Exact Bianchi Type-II Cosmological Vacuum Solutions in Jordan Brans-Dicke Theory 165
KARANJAI, S. and M. KARANJAI / Polynomial Approximations of Chandrasekhar's *H*-Function for Isotropic Conservative Scattering 331
NATH, ONKAR and H. S. TAKHAR / Spherical Shock Wave Propagation in Self-Gravitating Stars 159
SKALSKÝ, VLADIMÍR and MIROSLAV SÚKENÍK / Model of the Expansive Nondecelerative Universe 169

List of Forthcoming Papers 173, 335
